

COVID-19 Proposed Shooting Procedures – Wallaroo Rifle Club

From 1 July 2020

Range and clubrooms:

- All members are required to sign a bound, dated attendance register as part of the usual regulations (pens & hand sanitiser will be provided by the club) – we will ensure everyone also includes their mobile number. This will be strictly monitored by the captain (or a delegate nominated by the captain).
- The COVID-19 Health Status Declaration will be required to be completed by all members & visitors.
- Current contact details are also held by the captain and secretary for all members who will be in attendance – we will emphasise to all attendees that any change in contact details must be advised to the executive committee immediately.
- Anyone touching any communal items e.g. door knobs, gate locks, etc. must sanitise their hands prior.
- No more than 25 people will be permitted within the club rooms at any time and social distancing of 1.5m should be observed. A sign will be placed outside to confirm the maximum number of people allowed.
- Collection of weekly range fees will be monitored by the treasurer (or a delegate nominated by the treasurer) and due care will be taken in the handling of cash.

Range set up & Firing line procedure:

- Social distancing of 1.5m should be observed between all members during range set up of flags, etc.
- One person (Andrew, or a delegate nominated by him) will be responsible for set up/pack down of electronic target.
- The number of people responsible for setting up the tablets for shooters to view their shoot will be minimised. Anyone taking over scoring duties or otherwise touching equipment must sanitise their hands prior.
- All SSRs apply except where contradicted by the rules below, in which case the below rules will apply.
- Shooters & scorers/coaches should follow social distancing practices as much as possible except where otherwise required for the shooting to be carried out in line with usual practices.
- The sharing of equipment between members should not be permitted unless the item has been thoroughly sanitised (unless the members are both from the same household).
- All other members should ensure they are away from the firing line and adhere to the social distancing guidelines as best possible unless otherwise required to carry out the shoot. Members should be encouraged to minimise unnecessary contact.

APPROVED
